

About Seadyn

SeaDyn is an independent company specialising in structural & mechanical engineering, lifting & mechanical handling solutions, crane engineering and bespoke equipment. The company offers a range of engineering services from feasibility studies through to detailed design, procurement, on-site support and project management. We supply engineering only solutions and we undertake design & build projects using our network of approved suppliers.

An accomplished track record meeting client expectations, on time and on budget, makes SeaDyn an excellent engineering partner of choice.

Capabilities

- Project Management
- Structural Engineering
- Mechanical Engineering
- Subsea Engineering
- Lifting
- Mechanical Handling
- Crane Engineering
- Advanced Analysis (FEA)
- Bespoke Engineering
- CAD 2D/3D
